

**Title:** S&P 500 ETF Overview

**Content:**

The S&P 500 is an index that represents 500 of the largest publicly traded companies in the United States.

An S&P 500 ETF is designed to track the performance of this index. When you invest in an S&P 500 ETF, you are indirectly investing in all 500 companies.

Key characteristics:

- Broad market exposure
- Represents multiple sectors
- Considered a benchmark for the U.S. stock market

Advantages:

- High diversification
- Long-term growth potential
- Widely used globally

Risks:

- Market downturns can affect returns
- No protection against losses

S&P 500 ETFs are popular among global investors.
